

LAB ASSIGNMENT 1 – HTML GRADING INSTRUCTIONS

Reykjavik University

Deadline: **25th January 2019, 23:59**

The topic of this assignment is: **Writing HTML code.**

1 Point distribution

Each part (Text to HTML and HTML Forms) of Lab Assignment 1 is awarded between 0 and 5 points. The assignment is graded in a way that each part starts initially with 5 points and points are deducted according to the lists below, depending on which shortcomings exist in a student's solution. If one part ends up below 0 points due to point deductions, it is automatically set to 0 (i.e., it does not have a negative influence on the other part).

2 Part I: Text to HTML

The grading for Part I follows closely the list of requirements stated in the assignment. If they are not or only partially fulfilled, points are deducted from the highest possible amount (5 points) according to the following list. Unless stated otherwise, points are only deducted once for the same mistake.

1. Html, head and body or doctype are missing or incorrect: **-1 point.**
2. The title of the HTML document is not "httpIntro": **-1 point.** Capitalisation is permitted (e.g., HttpIntro is also accepted).
3. The main heading ("INTRODUCTION TO HTTP") is not enclosed in h1 tags: **-1 point.**
4. Headers are inconsistently or wrongly used: **-1 point.** For example, if the header for Section 2 has an h2 tag, the header for Section 3 also needs to have an h2 tag, and the header for Section 2.1 has to have h3 or lower.
5. Text exists without enclosing tag: **-1 point.** For example, a paragraph that exists without a p tag would lead to a point deduction.
6. Text in quotation marks is not bold and/or the quotation marks are not removed: **-1 point.** For example, if "headers" in Section 2.1 is either not bold, or bold but including the quotation marks, a point shall be deducted.
7. Lists either lack the list type or have the wrong type (unordered vs. ordered list): **-1 point.** For example, if the list in Section 4 is not encoded as an ordered list (ol tag), 1 point shall be deducted.

8. The textual table in Section 3 is not or not correctly encoded as an HTML table: **-1 point**. For example, if the table tag is entirely missing, or the tbody is missing, a point shall be deducted. Rows may be interpreted liberally, e.g., the second line may be interpreted as a single row with empty first column and "resource." in the second column, or instead be interpreted as a part of the first row.
9. A hyperlink is not encoded as such or points to the wrong url: **-1 point**.
10. A text reference to a later section is not encoded as a hyperlink, or incorrectly so: **-1 point**. Whether "Section" is part of the hyperlink or not is irrelevant.
11. The document does not validate without errors in the W3C validator: **-1 point per validation error**. Warnings are ignored.

3 Part II: HTML Forms

The grading for Part II follows closely the list of requirements stated in the assignment. If they are not or only partially fulfilled, points are deducted from the highest possible amount (5 points) according to the following list. Unless stated otherwise, points are only deducted once for the same mistake.

1. At least one input field differs from the screenshot or is missing entirely (this also includes the fieldsets): **-1 point**.
2. At least one form element in the Course context fieldset is not disabled: **-1 point**.
3. The textarea in the last fieldset is not 10 rows by 50 columns large by default: **-1 point**.
4. There exist a non-unique id attribute for a form element: **-1 point**.
5. The form action is different from submitEval.php and/or the method is different from post: **-1 point**.
6. The document does not validate without errors in the W3C validator: **-1 point per validation error**. Warnings are ignored.
